

# THE BEAST® HORIZONTAL GRINDERS

## Model 2680 Track

The Beast Recycler

The Beast® Model 2680XP Track offers exceptional versatility and all-terrain capability for tree services, municipalities, logging operations, sawmills, recycling yards and many other end users seeking a one-size-fits-all grinder. It's particularly useful in situations where debris or difficult terrain render a wheeled grinder virtually useless, such as land clearing in remote areas or processing in crowded yards filled with material. With either a 24-inch or 35-inch by 60-inch throat opening, the Model 2680XP Track can easily handle waste wood, plastic, rubber, roofing shingles, chunk wood and more. It's available with the patented Beast cuttermill or an optional chipping drum for producing screened wood chips.

### THE MODEL 2680XP IS USED EXTENSIVELY BY:
